

*This document presents **thought-provoking questions** to help you reflect on your project experiences, agile methodologies, and client management strategies.*

There are no right or wrong answers—only valuable insights based on real-world experiences.

Let's dive in!

1. Can you walk me through a recent project you worked on? What were your roles & responsibility in that project?
2. How do you approach gathering requirements from clients, and how do you ensure these are accurately translated into the system design?
3. Can you share an experience where post-deployment support was crucial?
4. How do you explain complex technical aspects to clients who may not have a technical background?
5. Can you provide an example of a conflict between a client's request and the system's limitations? How did you resolve it?
6. Reflecting on your previous projects, what was key lesson learned from a client interaction or project challenge, and how have you applied that learning in subsequent projects?
7. Can you walk me through your sprint planning, daily stand-ups, sprint reviews, and retrospectives?
8. How did you incorporate client feedback during sprints and adjust the backlog accordingly?
9. Can you share a time when a sprint retrospective led to a process change that improved the project outcome?
10. Did your project follow Agile or Waterfall methodology? Give me examples from your project.
11. Explain the Hierarchy in your project? Who used to assign you task & who use to review it?
12. How many types of documentation you have did and what role do you believe project documentation plays in a successful project?
13. What tools or software you are familiar about project management?

14. How did you approach gathering and documenting business requirements for project?
15. What testing strategies you followed to ensure a smooth deployment and minimize post-go-live issues?
16. How did you manage change requests and scope changes after some time of task allocation?
17. Do you have experience in dealing directly with clients?
18. What challenges have you faced while client interaction and did they accept your suggestion?
19. How do you ensure that stakeholders are informed and engaged throughout the project lifecycle?
20. What is your approach to handling client feedback, and can you give an example of a time when you received feedback and how you acted on it?
21. Can you walk me through your process for conducting a discovery session with a client, including preparing for the session and following up afterwards?
22. What is your approach to conducting daily stand-ups, and how do you ensure that team members are on track to meet their commitments?
23. How do you handle impediments or blockers that arise during a sprint, and can you give an example of a time when you had to escalate an issue to a product owner or Scrum master?
24. How do you handle ambiguity or uncertainty in a project? Can you give an example?
25. How do you prioritize your work and manage your time when faced with multiple competing demands?
